

Description BARA-KADE® GRANULAR is a granular Wyoming high quality sodium bentonite. The product is low-dust, for soil and geo-structure sealing, and hydraulic barrier applications.

Applications/Functions

- Sealant for ponds, lake, reservoirs, and other stationary water.
- Soil conditioning and modification.
- Hydraulic barrier applications for landfill liners & caps and sewer lagoon liners.

Advantages

- Untreated high purity sodium based bentonite.
- Creates easy pour, low dust granular.
- Exhibits low permeability and high swelling capability.
